-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 18 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

The traversal is on the grounds that the Examiner has not shown a serious burden and would be required to examine all the claims, irrespective of whether the groups requested are independent and distinct inventions. This is not found persuasive because 37 CFR 1.142 states "for purposes of the initial requirement, a serious burden on the examiner may be prima facie shown if the examiner shows by appropriate explanation of separate classification, or separate status in the art, or a different field of search as defined in MPEP § 808.02." A prima facie burden has been shown by separate classification as presented previously in the Detailed Action of 03/07/05.

Claims 18-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/11/05.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase, "conditions sufficient to produce the coupled aromatic compound" is indefinite because when one looks to the specification, only comparative

Art Unit: 1755

examples are given and it is unclear whether these are to represent prior art examples or applicant's own work. According to US practice it is common for "comparative examples" to represent work done by others and "examples" to represent work done by the applicant.

### ***Claims Analysis***

The examiner is interpreting "wherein" as a transitional phrase equivalent to "comprising". See MPEP 2111.02.

The examiner is interpreting claim 1 in light of the preamble because the method breathes life into the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang, et al. (US 5874606 A).

See entire document. Huang, et al. disclose a method for coupling an aryl magnesium halide compound with an aromatic ether to produce a coupled aromatic

Art Unit: 1755

compound of an aromatic aryl compound in the presence of a nickel catalyst comprising a phosphino ligand. (col. 1, l. 37-col. 2, l. 48) Tricyclohexylphosphine is disclosed (col. 2, l. 9). Suitable ether solvents are disclosed (preferred embodiment is THF; col. 2, l. 28-35). Method of making the components and product is also disclosed (col. 2, l. 51-col. 3, l. 48; col. 4, l. 36-col. 5, l. 22).

### ***Relevant Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patent family by Adams, et al. (US 5811549 A, US 6218537 B1, US 6329526 B1 and US 6569871 B1) disclose processes of preparing imidazole, pyridyl and pyrimidine compounds and substituted compounds thereof which use nickel phosphino compounds in their synthesis.
